Product Brochure.

WILO Ball & Check Valves with rotating flange

Isolation Valves

The WILO Ball and Check valves with rotating flange and optional check valve are designed for the isolation of any WILO Star or Stratos ECO series circulator. The forged brass body and flange provide strength and versatility for any application where a pipe and flange meet. Featuring a solid hard chrome plated brass ball with reinforced Teflon® seats and a blowout proof stem sealed with Teflon® (PFTE), actuated by a vinyl coated stamped steel handle. Mounting bolts, nuts, an additional "T" style wing handle are included with each valve. Effective? We call it *Pumpen Intelligenz!*

WILO Ball / Check Valves

The only way to isolate circulator pumps!
